SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications using React, Node.js, Spring Boot, AWS, and REST APIs. Skilled in designing efficient backend systems, developing responsive frontend applications, and delivering end-to-end solutions in fast-paced Agile environments.

EDUCATION

B.Tech in Computer Science | CGPA: 9.26

Institute of Technical Research and Education, Bhubaneswar

Jun 2019 – Jun 2023

Odisha, India

SKILLS

- **Languages:** JavaScript, TypeScript, Java, Python, SQL
- **Frontend:** React, Next.js, Redux, Material UI (MUI)
- **Backend:** Node.js, Express, Spring Boot, RESTful APIs
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Cloud & DevOps:** AWS (EC2, S3, ECS, Lambda), Docker, Jenkins, CI/CD

EXPERIENCE

KFin Technologies Ltd.

Software Engineer

Aug 2023 – Present

Hyderabad, IN

- Shipped full-stack features end-to-end using **Micro-Frontend Architecture**, boosting performance by 25%, cutting release cycles by 70%, and reducing production defects by 30%.
- Built with **React, TypeScript, Redux, and MUI** on the frontend and **Node.js/Express** REST APIs on the backend, with **Jenkins** automating CI/CD across all services.
- Led 100+ code reviews across **React and Node.js** codebases, enforcing clean code standards and fostering a culture of quality and shared team ownership.
- Drove adoption of **Micro-Frontend Architecture**, decoupling module ownership to enable independent deployments and parallel development across product teams.

KFin Technologies Ltd.

Software Developer Intern

Aug 2022 – Jul 2023

Hyderabad, IN

- Built and deployed a full-stack distributor onboarding portal from scratch, increasing signups by 30% in the first month and improving performance by 40% via cloud optimisation.
- Developed with **React** frontend and **Node.js/Express** APIs, deployed on **AWS (EC2, S3, ECS, Lambda)** with **MongoDB** and **PostgreSQL** for data storage.
- Implemented **JWT-based** auth and designed dual-database schemas – **MongoDB** for documents and **PostgreSQL** for transactional records – ensuring secure, scalable data handling.

PROJECTS

Xalts – Client/Investor Onboarding | *MongoDB, Express, Node.js, React, PostgreSQL, Jenkins*

Ongoing

- Architected a **Micro-Frontend** with **React and Redux** to decouple AIF and Mutual Fund modules – each independently deployable, reducing cross-team conflicts and release dependencies.
- Designed **Node.js/Express** REST APIs with dual-database backing: **MongoDB** for flexible KYC document storage and **PostgreSQL** for structured relational records like fund details and user state.
- Configured a **Jenkins CI/CD** pipeline with lint, test, build and deploy stages – fully automating end-to-end delivery for both frontend and backend, cutting release turnaround by 70%.
- Built a reusable **MUI** component library wired to **Redux** state and **Node.js** APIs, ensuring consistent UI behaviour and real-time data sync across the platform.

Distributor Empanelment Portal | *MongoDB, Express, Node.js, React, PostgreSQL, AWS*

2023

- Built a full-stack portal with **React** frontend and **Node.js/Express** REST APIs, handling multi-step distributor registration, document upload, and approval workflows end-to-end.
- Deployed on **AWS** using **EC2** for compute, **S3** for storage, **ECS** for containers, and **Lambda** for event-driven tasks – improving application performance by 40%.
- Modelled data across **MongoDB** for flexible KYC document storage and **PostgreSQL** for structured transactional records, schemas optimised per read/write pattern.
- Secured all API routes with **JWT** token validation and role-based access control, ensuring data integrity between the **React** frontend and **Node.js** backend.
